

Digital Skills - Supported Learning

This course is designed for Supported Learning learners who would like to build their confidence in using digital skills. It provides a gentle, supportive introduction to using digital devices, going online safely, and completing everyday digital tasks. Learners will develop their skills at a pace that suits them, with plenty of encouragement, practical activities, and guided support. As part of the course, learners use widely recognised applications such as Microsoft Word, PowerPoint, and Google tools to research information and complete creative or practical projects. All projects are planned and adapted based on learner feedback, ensuring that activities are meaningful, enjoyable, and relevant to individual interests and goals. This supportive approach helps learners build digital confidence, strengthen independence, and prepare for further learning or everyday technology use.

Start Date: 24 September 2026
Start Time: 13:00
Lessons: 33
Weeks: 33
Hours: 66.00

Please note: There is no class on Thursday 17 December 2026.
